

## **ENERGY EFFICIENCY POLICY**

To protect our world from possible dangers, we use our energy efficiently and set targets to reduce our energy consumption.

For this;

- In order to fulfill both our responsibilities towards nature and our legal obligations, we follow national and international standards, laws and regulations, voluntarily carry out work to reduce energy use and/or continuously improve our energy consumption performance, and monitor the results of our work.
- We set targets and include energy efficiency in our training programs to ensure the participation of our employees.
- We attach importance to collaborating with all our stakeholders to create common goals and results in energy management. We try to continue our interaction with our guests, employees, visitors and all business partners in order to reach an overall level of awareness and consciousness on these issues.
- We try to research, find, purchase and use suitable energy-efficient products, equipment and technology alternatives.
- We aim to document our Energy Management System, disseminate it to all our departments, update, review and continuously improve it when necessary.
- We evaluate energy risks or emergencies that may arise such as energy constraints and plan the measures that can be taken.
